20 - 50 lb	2½ - 5 cups
50 - 100 lb	5 - 8 cups

*Standard 8 oz measuring cup contains approximately 4 oz of dog food.

Feeding Guidelines

These feeding guidelines are a starting point. Adjust feeding amounts to your dog's individual requirements to achieve optimal condition and weight. Highly active working dogs may require 25%-100% more food than for adult maintenance.

The above chart represents the amount of Hi-Protein 27 dog food per day. During periods of increased activity or when consumption increases, multiple smaller meals per day are recommended.

Feeding Hi-Protein 27 dog food for the first time? Mix increasing amounts of Hi-Protein 27 with decreasing amounts of the old food, over a seven-day period.

For late pregnancy or nursing dogs, keep food available at all times. After whelping, nursing females may require 2-3 times normal adult maintenance intake.

For puppies, begin weaning at 3-4 weeks of age by offering Hi-Protein 27 dog food moistened with warm water. Feed as much as they will eat, three times per day until fully weaned. Slowly reduce added water over several days until you are feeding dry. Once fed dry, for most puppies, Hi-Protein 27 dog food can be made available at all times.
